ReUsable Sticky Mats

ReUsable Sticky Mats are high performance, industrial strength contamination control tacky mats and are ideal for inside and outside critical areas, such as ISO certified clean rooms and laboratories.

The permanently tacky surface is designed to remove even the finest particles off shoes or wheels. In fact 98-100% of all such contamination will be removed if each foot touches the mat 3 times.

When cleaned, the surface will regenerate its tack. To clean, just mop with water or a low Ph cleaner such as Simple Green. Squeegee the extra moisture off the mat and allow the mat to dry.

These sticky mats have a super polymer surface is bonded to a durable base that provides stability and long-lasting performance. The adhesive backing helps prevent mat movement and eliminates the need for a supplemental tray. The mat has a low profile to fit under any doorway.

“Green” product that can be used to replace multiple layer tacky mats. With no sheets to throw away, there is much less waste.

- Surface is static dissipative - $RTT = 1 \times 10^8$ to 1×10^{10} ohms.
- 24”, 30” and 54” wide material is available in cut lengths > 5’ long. Please call for a quote.
- Life expectancy is two (2) years under normal wear conditions with a payback in ~ 9 months.

Item No: SM.PRSM
